# Cost Estimator

Pricing & Infrastructure Report

TestBank

Mode: SaaS — BusinessNext  
Hosted

Date: 09 June 2026

Inflation: 4% / yr

AWS Region: us-east-1

## Executive Summary

High-level cost overview and infrastructure snapshot

|                           |                  |                    |                 |
|---------------------------|------------------|--------------------|-----------------|
| <b>\$50,000</b>           | <b>\$600,000</b> | <b>\$3,265,994</b> | <b>8,500</b>    |
| Monthly Cost              | Annual Cost      | 5-Year Total       | Named Users     |
| Production + environments | Year 1 total     | At 4% inflation/yr | Year 1 licensed |

| Monthly         | Annual           | 5-Year             |
|-----------------|------------------|--------------------|
| <b>\$50,000</b> | <b>\$600,000</b> | <b>\$3,265,994</b> |

### Project Details

|                       |                            |
|-----------------------|----------------------------|
| Customer / Bank       | TestBank                   |
| Client Mode           | SaaS — BusinessNext Hosted |
| Database Type         | PostgreSQL                 |
| Total Named Users     | 8,500                      |
| Concurrent Users      | 2,550 (30% of named)       |
| Mobile Users          | 0                          |
| Worker Nodes          | 0                          |
| Total vCPUs (worker)  | 0                          |
| Total RAM GB (worker) | 0 GB                       |
| Data Size             | 0 GB                       |
| Estimate Date         | 09 June 2026               |

# Node Distribution

AI-assisted infrastructure architecture

|                       |             |
|-----------------------|-------------|
| Total Worker Nodes    | —           |
| Total DB Nodes        | —           |
| Fixed / Managed Roles | 0           |
| ClickHouse OLAP Nodes | Not enabled |
| Confidence            | —           |

## AI Services Infrastructure

Predictive AI · GenAI · Agentic AI — Kubernetes cluster sizing (Maybank template)

|                       |                                    |
|-----------------------|------------------------------------|
| AI Types Enabled      | Predictive AI · GenAI · Agentic AI |
| Total AI Worker Nodes | 13                                 |
| Total AI vCPU         | 192                                |
| Total AI RAM          | 384 GB                             |
| Total AI Storage      | 10,116 GB                          |
| AWS Bedrock (LLM API) | \$4,000/month — No self-hosted GPU |

### AI Cluster Configuration (Production)

| AI Type       | Nodes | Total Cores | Total RAM | Total SSD | Databases                                                   | Est. Compute/mo |
|---------------|-------|-------------|-----------|-----------|-------------------------------------------------------------|-----------------|
| Predictive AI | 2     | 16          | 32 GB     | 500 GB    | —                                                           | \$841/mo        |
| GenAI         | 2     | 32          | 64 GB     | 400 GB    | CRM Database (SQL DB) (500 GB)                              | \$841/mo        |
| Agentic AI    | 9     | 144         | 288 GB    | 9,216 GB  | Vector DB (Milvus) (200 GB); CRM Database (SQL DB) (800 GB) | \$3,784/mo      |

|                  |                                                    |
|------------------|----------------------------------------------------|
| GPU Requirement  | None — all LLM inference via AWS Bedrock (managed) |
| Bedrock API Cost | \$4,000/month (user-configured, token-based)       |
| Annual Bedrock   | \$48,000                                           |
| 5-Year Bedrock   | \$270,383 (at 4% inflation)                        |

# AWS Cost Breakdown

Service-by-service monthly and annual costs

## Cost Summary

|                               |             |
|-------------------------------|-------------|
| Total Monthly (Production)    | \$50,000    |
| Total Annual (Year 1)         | \$600,000   |
| 5-Year Total (with inflation) | \$3,265,994 |
| Inflation Rate Applied        | 4%          |

# 5-Year Inflation Forecast

Cost projection at 4% annual inflation

# PUPM Analysis

Price Per User Per Month — 5-year projection

| Year   | Named Users | Monthly Usage | Platform Annual | AWS Total | Discounted Cost | PUPM     |
|--------|-------------|---------------|-----------------|-----------|-----------------|----------|
| Year 1 | 8,500       | \$51,008      | \$636,050       | \$667,852 | \$782,495       | \$7.6715 |
| Year 2 | 8,925       | \$53,008      | \$660,989       | \$694,038 | \$803,002       | \$7.4977 |
| Year 3 | 9,371       | \$55,088      | \$686,925       | \$721,272 | \$834,511       | \$7.4210 |
| Year 4 | 9,839       | \$57,252      | \$713,899       | \$749,594 | \$867,281       | \$7.3456 |
| Year 5 | 10,331      | \$59,501      | \$741,952       | \$779,050 | \$901,361       | \$7.2707 |

## Discounted Annual Cost Trend

## Formula Applied

|                     |                                                                    |
|---------------------|--------------------------------------------------------------------|
| Business Support    | 3.91% of Total Monthly Usage                                       |
| Buffer              | 5% of Total Platform Annual Cost                                   |
| Managed Services    | 30% of Total AWS Annual Cost                                       |
| Discount            | 11% off Total Cost                                                 |
| PUPM                | Discounted Annual Cost ÷ 12 ÷ Named Users                          |
| User Growth         | +5% per year (Year-over-Year)                                      |
| One-Time Costs (Y1) | Performance: \$5,000 · Migration: \$5,000 · Managed Setup: \$1,000 |

# Notes & Assumptions

Detailed pricing basis, scope, and validity

## ■ Pricing Validity — 15 Days Only

This estimate is valid for **15 calendar days** from the date of issue (**09 June 2026**). AWS On-Demand prices, instance availability, and currency exchange rates are subject to change without notice. A revised estimate must be requested if requirements change or the validity period lapses.

## Pricing & Infrastructure Assumptions

|                             |                                                                                                                                                                                                         |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| AWS Pricing Basis           | All prices are AWS On-Demand, Linux/UNIX, shared tenancy. No Reserved Instances or Savings Plans applied. Switching to 1-Year Reserved pricing typically reduces compute costs by 30-40%.               |
| Region                      | Estimate uses region: us-east-1. Costs vary by region — a regional multiplier is applied to the base us-east-1 rate.                                                                                    |
| Inflation Rate              | 4% per annum applied to all compute and managed-service costs from Year 2 onwards, reflecting typical AWS price adjustments and currency exposure.                                                      |
| High Availability (AZ)      | Production and DR environments are architected as Multi-AZ (High Availability). Pre-Prod/SIT/UAT are Single-AZ to optimize costs while maintaining functional parity.                                   |
| Security & Compliance Costs | Fixed INR-converted estimates included: Airtel SOC \$500/mo, SOC Machines Rs.30,000/yr, Req 4 Antivirus Rs.2,600/yr, Req 6 Data Discovery Rs.4,000/yr. These are not subject to AWS price changes.      |
| Pre-Prod / SIT / UAT        | Environments sized at ~40% of Production infrastructure. PostgreSQL uses self-hosted EC2 (Patroni HA). SQL Server / Oracle use AWS Managed. Costs are additive and not included in the Production PUPM. |
| Disaster Recovery (DR)      | DR sized using a Pilot Light / Warm Standby model at ~50% of Production compute. Active-Active DR would approximately double the DR cost shown.                                                         |
| Managed Services            | Managed Services fees (30% of AWS annual total) cover platform monitoring, patching, incident management, and lifecycle support by the BusinessNext operations team.                                    |

## Scope of This Estimate

|          |                                                                             |
|----------|-----------------------------------------------------------------------------|
| Included | Production cloud infrastructure (compute, database, storage, networking)    |
| Included | Pre-Production / SIT / UAT environments (if selected)                       |
| Included | Disaster Recovery environment (if selected)                                 |
| Included | BusinessNext platform licensing and managed services                        |
| Included | One-time migration, performance testing, and managed-service setup (Year 1) |
| Excluded | Application development or customisation effort                             |
| Excluded | End-user device provisioning or on-site hardware                            |
| Excluded | Third-party SaaS subscriptions (e.g. Salesforce, Twilio, Okta)              |
| Excluded | Data centre co-location or physical network charges                         |
| Excluded | Regulatory compliance certification fees                                    |

### Legal Disclaimer

This document is prepared by BusinessNext for the exclusive use of the named client organisation. All cost figures are estimates based on current AWS/GCP published pricing and the inputs provided at the time of generation. Actual costs may vary depending on usage patterns, reserved-instance commitments, enterprise discount programmes, and any changes to cloud provider pricing.

This estimate does **not** constitute a binding commercial offer or contract. A formal Statement of Work (SOW) and Order Form must be executed prior to commencement of any services. BusinessNext reserves the right to revise this estimate upon receipt of updated requirements or upon expiry of the 15-day validity period.
